In regards to the NAB's petition 04-160 is ratically unconstitutional and in a generalized way devoids the 1st amendment. I enjoy my weather service broadcast and use them when I travel. For once new technology allows me to listen to an Extreamly wide variety of music and information and not be tormented by endless advertising and idiotic marketing strategies of conventional radio and The big bully market economy along with politics wants to rape XM radio. If this petition passes whats to stop them from taking of the industry like the so called domino affect? This is NOT RIGHT. Please prevent the NAB's petition 04-160 from passing. Thank you.
